**Ufd107. Brakey Lee Wood (4.7 ha) TL 533357**

This ancient woodland site has been completely replanted with Poplars (*Populus* sp.), with only isolated standards of Ash (*Fraxinus excelsior*) and Pedunculate Oak (*Quercus robur*). The poor ground flora is characterised by ruderals. It would be desirable to reinstate a native broadleaved canopy.

Date of selection/last revision: 1994
