**Ufd185. Oak Wood (2.1 ha) TL 586387**

The canopy of this ancient wood is dominated by Ash (*Fraxinus excelsior*), with occasional Pedunculate Oak (*Quercus robur*) and an understorey of Hawthorn (*Crataegus monogyna*) and invasive Elm (*Ulmus* sp.). The rather poor ground flora is typified by Bluebell (*Hyacinthoides non-scripta*) and Dog's Mercury (*Mercurialis perennis*).

Date of selection/last revision: 1994
